

What is AdapteCCa ?

AdapteCCa, the Platform on Adaptation to Climate Change in Spain,

has been created by the Spanish Office for Climate Change and Fundación Biodiversidad, both part of the Ministry for Ecological Transition and Demographic Challenge, to facilitate **consultation and information exchange** on this matter and to strengthen the capacity of society and administrations to adapt, within the framework of the **National Climate Change Adaptation Plan (PNACC)**.

You can use it to:

- **LEARN ABOUT PLANS AND PROGRAMMES** for climate change adaptation,
- **OBTAIN INFORMATION** to develop a local adaptation strategy
- **ADAPT YOUR ORGANISATION** to climate change
- **FIND TOOLS** to host activities to raise awareness
- **ACCESS INFORMATION** on impacts, vulnerability and how specific socioeconomic sectors or territories can adapt
- **AND TO STAY UP TO DATE** with events, reports and news related to these matters.

AREAS OF WORK

You will find a selection of the most important documents, websites and projects, classified by the work areas the PNACC has defined:

- | | |
|--|---------------------------------|
| 1 Climate and climate scenarios | 10 Energy |
| 2 Human health | 11 Mobility and transport |
| 3 Water and water resources | 12 Service industry |
| 4 Biodiversity and protected areas | 13 Tourism |
| 5 Forestry, desertification, hunting and fishing | 14 Finance and insurance |
| 6 Agriculture, livestock, fishing and food | 15 Disaster risks reduction |
| 7 Coasts and marine environment | 16 Research and innovation |
| 8 City, urban planning and building | 17 Education and society |
| 9 Cultural heritage | 18 Peace, security and cohesion |

POLICIES, PLANS AND PROGRAMS

This section sets out all regulations and planning related to climate change adaptation at all administrative levels, from local to international. Each of them includes an overview of its scope and then displays all the plans available.

- INTERNACIONAL** The work undertaken by the United Nations Framework Convention on Climate Change (UNFCCC) and the Intergovernmental Panel on Climate Change (IPCC), stands out.
- EUROPEAN UNION** The European Union's Adaptation Strategy stands out as a guiding framework for the Member States.
- NATIONAL** The National Climate Change Adaptation Plan is the Spanish State's fundamental legislation on adaptation.
- AUTONOMOUS COMMUNITIES** You can use the interactive map to consult regional regulations and contact those responsible for them.
- LOCAL** This section includes analyses of vulnerabilities, municipal plans to address climate change and plans for adaptation to this phenomenon prepared by local entities.

NEW FUNCTIONS AND TOOLS

AdapteCCa has updated its image, design and interface to offer a more immersive experience for the platform user and has incorporated modules as useful and visual as these:

PRACTICAL CASES OF ADAPTATION

1

The case studies module reflects a selection of **more than 40 inspiring initiatives** to address climate change adaptation made by public administrations, private sector entities or organisations. These projects range from local to the international scale and deal with the multiple impacts as a result of climate change in Spain. The search engine allows you to filter projects by PNACC sectors, by keywords or by the type of impacts or measures implemented.

This interactive module also connects to **Climat-ADAPT**, the European adaptation platform, which also has a library of case studies.

CLIMATE CHANGE SCENARIO VIEWER

2

AEMET, the Spanish Climate Change Office (OECC), CSIC and the Biodiversity Foundation have developed a **viewer that shows projections of possible future climate scenarios** through the effect of climate change on variables such as temperature or precipitation for different time periods.

If you would like to find out more, please consult the **viewer documentation** and the **frequently asked questions**.

RESOURCE FINDER

3

This **search engine** allows you to locate adaptation documentation by sector, type of document (publications, studies and research projects, manuals and guides, among others), geographic scope or keywords.

PUBLIC INFORMATION

4

This section offers access to visual materials and other resources for communication, notification and training related to climate change adaptation:

PROJECT VIDEOS

INFOGRAPHICS

SEARCH ENGINE
for informative resources

INTERACTIVE DOSSIER
on adaptation

IMAGE BANK
More than 440 images showing the different causes and consequences of climate change and cases of adaptation!

EXPERIENCES OF ADAPTATION
(multimedia resources)

ONLINE CLASSROOM

EXHIBITIONS

IN ADDITION TO ALL THESE TOOLS, YOU WILL BE ABLE TO ACCESS A CALENDAR OF EVENTS AND CONFERENCES, CONSULT NEW DOCUMENTS AND NEWS ON CLIMATE CHANGE ADAPTATION!

PARTICIPATE IN ADAPTECCA

WHAT CAN YOU DO AS AN ADAPTECCA USER?

Sign up to the platform and subscribe to our Newsletter

Exchanging impressions in the AdapteCCa Community

Create or participate in working groups

Add new documents or events

Suggest the publication of new informative resources
